

Choose the right FarmIQ pack for you

Lite

Remove the pain of rules and regulations by managing compliance in one simple and practical place

Lite keeps things simple, while effectively sorting your compliance requirements. You'll have your own interactive farm map, staff management tools and everything you need to keep up with rules and regulations.

Essentials

Have all your essential farm data at your fingertips for more accurate and valuable decision-making

The Essentials pack is the ideal first step into farm recording, with all of your vital farm information safe and sound in one place, and integrated NAIT reporting for all your stock movements. It has everything you need to plan, record and recall what's happening with your animals, land, staff and inventory in a way that's simple and easy.

Performance+

Increase production and profitability with better stock and grazing management

The Performance+ pack helps you achieve your profit, production and sustainability goals for your farm. In addition to all the Essential pack features, there are a range of pasture and animal management tools to help you optimise the growth and use of your pasture.

Pro

Identify and manage individual animals that are helping your bottom line versus the ones that are hurting it

With EID recording and reporting, Pro lets you track the productivity and welfare of every single animal on your farm. It gives you the information required to optimise your livestock in an easy-to-understand format, plus powerful analysis of the entire farm operation.
