

One place, one system.

Everything you do on farm is connected, having all your farm's data, current and historic, in one place means you can make better, more informed decisions for the future. With FarmIQ's farm management software everything is in one place and accessible quickly and easily from anywhere.

The power of being connected

You know that EID is more than just compliance. Accurate information animal's history, from health treatments to grazing rotation and pedigree directly impacts its weight and production. Keeping track of your animals' performance has never been easier thanks to Gallagher and FarmIQ teaming up meaning all the information you need to make the best business decision is at your fingertips – wherever you may be!

- Track animal weights against targets to identify animals that need special treatment.
- Perform on-farm trials to compare groups of animals to determine the impact of alternate farm management decisions (eg sire genetics, feed management) on live-weight production.
- Build a performance history against individual animals within a flock or herd to help identify those animals to retain for breeding requirements, those to mate to terminal sires and those to cull.
- Meet NAIT and processor compliance requirements.

FARM IQ

The power of being connected with Gallagher and FarmIQ.

STOP THE GUESSWORK. MAKE THE RIGHT CALL.

Connecting your Gallagher Weigh Scale or Reader means all data collected flows into FarmIQ automatically – no data entry needed. Allowing you to see in real-time, not only what’s happening with your animals now, but also what happened yesterday, last week or last season and why. FarmIQ holds all your land, staff, production, compliance and feed data which impacts each and every one of your animals. Use FarmIQ’s farm management software in conjunction with Gallagher’s weigh scales and EID readers to understand how each of your farming decisions are impacting your animals and improve future decision making.

HOW TO GET CONNECTED

It doesn’t cost a cent to get the data flowing from your Gallagher EID reader or weigh scales into FarmIQ, but you will need to be on the right FarmIQ pack and using the right Gallagher equipment.

GALLAGHER HAND HELD EID TAG READERS

Powerful, portable EID data collection

Gallagher’s Hand Held Tag Readers have the following benefits:

- Full animal management recording capabilities including weight and other animal data
- Excellent read accuracy with positive confirmation of tag read (beeper sound and LED flash)
- Ergonomic design with soft grip handle
- Super safe hand guard and long snout to reduce risk of trapping hand or arm.

Two models available:

HR4

HR5
